

MORENO PLANT

CYPRESSES

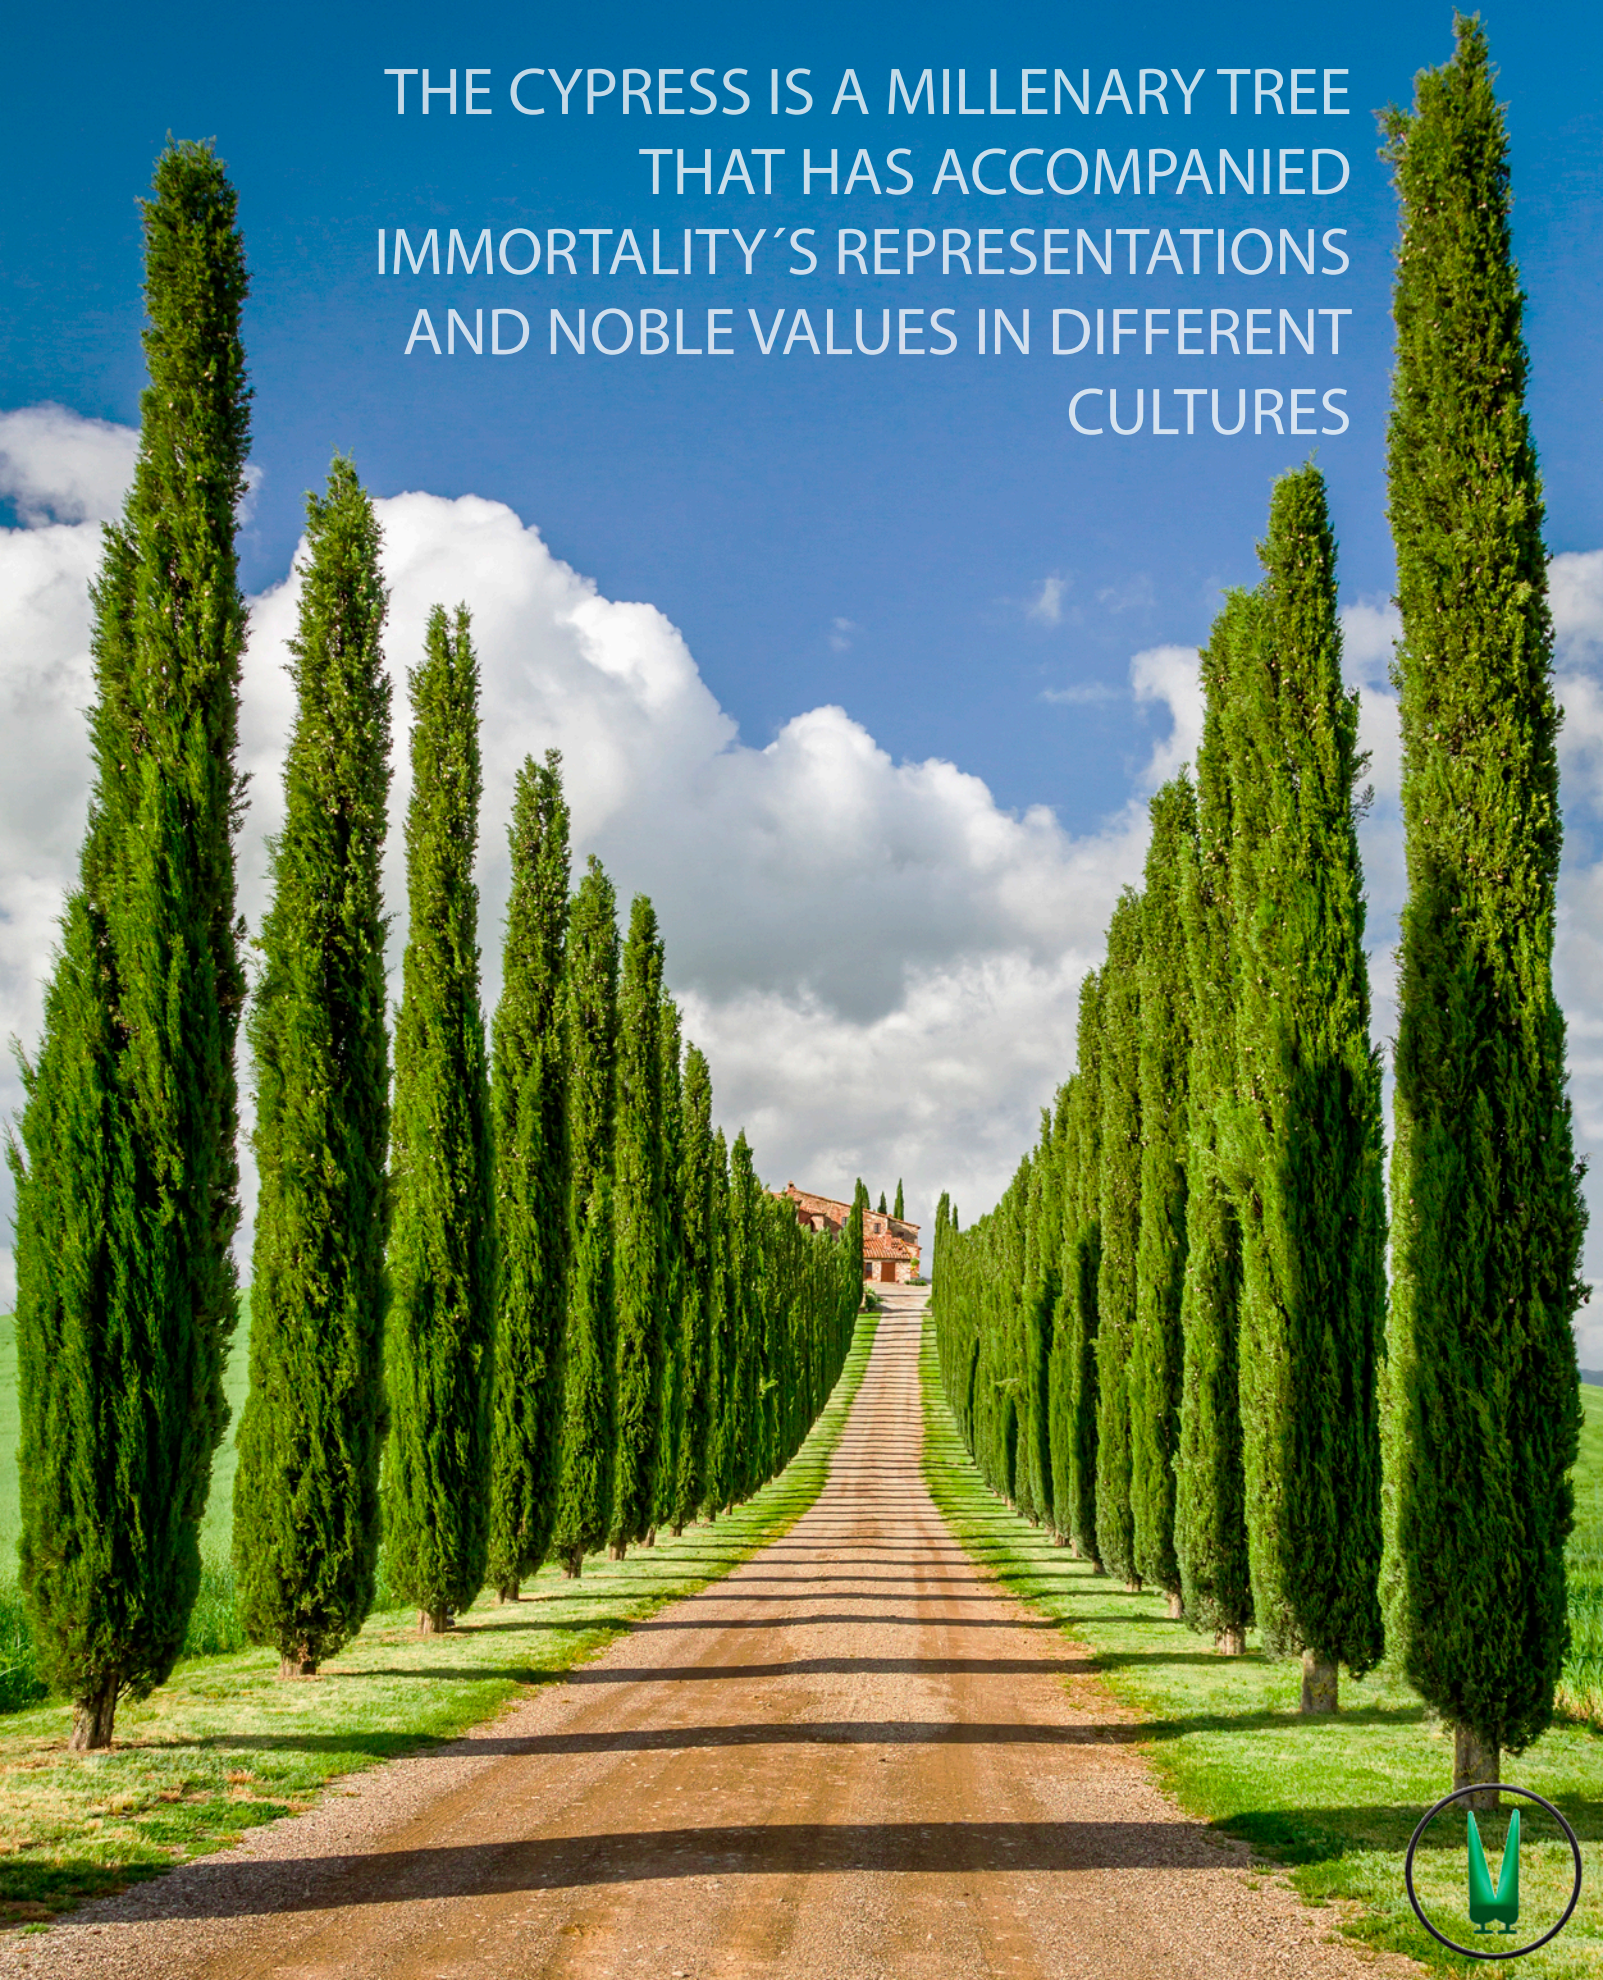

About us

MorenoPlant is a family enterprise located in Polinyà de Xúquer (Valencia, Spain) for four generations, we have dedicated ourselves to the growing and sale of ornamental plants, from the shoot to the final product. We supply wholesalers, market gardens and garden centers. Our enterprise specializes in cypresses of all sizes. We offer personal customer services and well developed transport logistics in order to ensure the trouble-free distribution of our products.

LONG-LASTING AND UPRIGHT

THE CYPRESS IS A MILLENARY TREE
THAT HAS ACCOMPANIED
IMMORTALITY'S REPRESENTATIONS
AND NOBLE VALUES IN DIFFERENT
CULTURES

THE CYPRESS

The cypress (*cupressus sempervirens*) is a tree of the coniferous family, one of the oldest known. Long-lasting and upright, the cypress is a millenary tree that has accompanied immortality's representations and noble values in different cultures, owning an important aesthetic value.

Its origin dates back to the Mediterranean sea's eastern region, in areas nowadays occupied by Italy, Cyprus or Syria. It is believed that over two or three thousand years, it was part of large forest areas in North Africa, even though they are not still preserved today.

The cypress tree can reach up to 30 meters height. Its cup presents a compact and tight aspect, with a columnar or pyramidal form, suitable branches; being its wood heavy and long-lasting. This tree properly tolerates the pruning and is resistant to adverse conditions, like hot or drought, even accepting the polluted atmospheres of the cities. Shows indifference to the mineralogical nature of floors, being able to live either in acid or basic lands, perfectly bearing arid or compact lands.

We are nonetheless in front of one of the most common specimen used in gardening, with considerable ornamental value's varieties. Is usually used to form shield hedges against the wind, to repopulate, as firewall or with decorative purposes, it can be planted in isolation or forming beautiful alignments on alleys and parks. A perennially green and upright tree that, with its stretched figure, seems to reach the sky.

CYPRESS M14 (1,5L)

Next to nursery pots, we also offer cypresses in pots of 14cm. Of all sizes, this type is the most popular and sold cypress. It reaches between 60-90cm and is mostly used as windbreak or dividing fence. Every season, MorenoPlant produces more than 400.000 pieces of this type exporting it to different places in Spain as well as all over Europe.

POTS	14cm
HEIGHT	>60cm
CAPACITY	Carrier 250-300 pcs. Box Pallet 500 pcs.

CYPRESS M20 (5L)

One of the most demanded sizes at MorenoPlant is the cypress in pots of 20 cm. This cypress is cultivated and fertilized by drip irrigation and is supported vertically by a stick for perfect fixation. This cypress is more compact than the other ones.

POTS	20cm
HEIGHT	>1.20m
CAPACITY	Carrier 50-70 pcs. Box Pallet 110-130 pcs.

CYPRESS M25 (10L)

Finally, this is the tallest cypress produced at MorenoPlant. Like the cypress M20, this type is also cultivated and fertilized by drip irrigation and is supported vertically by a stick for perfect fixation. This cypress is the tallest one, reaching 2 meters, and is evaluated very positively by our clients.

POTS	25cm
HEIGHT	>1.60m
CAPACITY	Carrier 25-35 pcs. Box Pallet 60 pcs.

FORMS OF TRANSPORT

CARRIER Carry

In order to deliver your plants fast and conveniently, we offer the transport in carriers. This way, the plants are well protected in special trays in order to facilitate the transport, loading as well as unloading. (We only use carriers CC, with a "red lock")

*The carry system works only in Spain

BOX PALLET BoxPallet

If you wish to transport more plants than can be fit in a carrier, enjoy the same fast and easy delivery with our box pallets. These wooden boxes of 80x120 cm, comprise 500 plants in pots of 14 cm or around 120-150 plants in pots of 20 cm.

FREQUENTLY ASKED QUESTIONS

WHICH WAYS OF PAYING ARE THERE?

You can pay in cash, by cheque or transfer the money

ARE THE TRANSPORT COSTS COVERED BY THE ENTERPRISE?

No, the transport costs have to be covered by the client. In case of a destination within 30 km, the transport is at our expense.

CAN THE CYPRESS FUNCTION AS A FENCE FOR FIRE PROTECTION?

Yes, indeed. Experts confirm that the wood is not inflammable. There are more and more people who protect their cottages from possible forest fires by means of cypresses.
